## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Clanton (3154786).

Regarding Claims 1-9, Clanton shows a flat-top antenna for a car formed of multi-strand conductors 11,12 connected to form turns, positioned on a mechanical support pieces 35 of dielectric on a wall (roof), and at right angles to the support and supported with mechanical holding means 26, all arranged as claimed.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 10-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Clanton.

Art Unit: 2821

Regarding Claims 10-13, the use of "staples", bonding and support molding are all obvious securing means for securing the antenna to a particular wall of the vehicle. As to Claim 13, the antenna is employed in any communication system.
